

Suttind Seeds Pvt Ltd was incorporated in 1991 by Kumar group of Companies Calcutta as an off shoot of SUTTON and was involved in production and marketing of vegetable seeds. It was a small but significant beginning. The company changed hands in 1999 and has since then established itself as a leading brand in vegetable seeds both open pollinated and hybrids. The headquarters of the company were also shifted from Calcutta to Delhi

SUTTIND was primarily a temperate seed company specializing in cabbage turnip kohlrabi beet etc, but with the change of management we took it as a challenge to establish ourselves in tropical vegetable seeds, and thus with the help of our small but dedicated research team we tried to develop hybrids of tomatoes, chilli, cucurbits and gourds and melons and have been successful in launching many promising varieties of these vegetables. We continue to have a significant share of open and hybrid cabbage seed market as also of European carrot. Our research and development centres in Karnataka Delhi and Solan have contributed to maintaining quality control over the varieties which we produce, procure and market

We are a professionally run company contributing in our own humble way to the growth and prosperity of the Indian farmer. Any new variety is launched only after undergoing field trials at our farms and actual location for which the product is targeted involving both the farmers and traders of the area

Suttind Seeds is aware of the increasing changes in the seed industry around the globe and are developing varieties for better quality, adaptability, disease and insect pest resistance. The company operates on trust and confidence reposed by the farmers over the years. It shares common values and purpose and continues to strive for the betterment of the farming community by renewing its pledge to supply high quality seeds. Our reputation is built on success of our seeds, which are seen as benchmark of quality by both farmers and dealers. The mission of Suttind Seeds is to supply our customers with a consistent source of high quality vegetable seeds. We offer seeds of proven open pollinated and hybrid varieties, both proprietary and public selections, and our own range

We have our corporate and head office in Delhi with branches in Bangalore, Nasik, Solan and Calcutta

Thus covering virtually the entire spectrum of the Indian seed market

We are also an established name in flower and vegetable seeds for the amateur gardener. Full pictorial range is available in premium SUTTIND INDIA brand and economy SOLITAIRE brand. Besides we are also distributors for Goldsmith Seeds USA, Fothergill Seeds UK, Johnson Seeds UK and Sutton Seeds UK

The following pages contain description of our premium vegetable varieties. The list is not exhaustive due to space constraint. Pdf version is also available. A section is also devoted to various packing available. A small section is devoted to flower seeds and more information is being added shortly with the purpose of making available online catalogue of flower seeds with description and other cultural practices
